

Job Title: Associate Database Administrator

Company Description

Epsilon is a global data, technology and services company that powers the marketing and advertising ecosystem. For decades, we've provided marketers from the world's leading brands the data, technology and services they need to engage consumers with 1 View, 1 Vision and 1 Voice. 1 View of their universe of potential buyers. 1 Vision for engaging each individual. And 1 Voice to harmonize engagement across paid, owned and earned channels. Epsilon specializes in the implementation, management and evolution of Custom and PeopleCloud solutions, offering end-to-end support for clients. By collaborating with client partners and strategy teams, we create impactful campaigns tailored to each client's unique objectives.

Job Summary:

A consolidated team of database technology professionals, we provide expertise across all major database engines and Big Data solutions to support Epsilon products and platforms. The team has a unique alignment that combines a horizontal organizational structure with vertically aligned sub-groups dedicated to our clients. By adhering to consistent standards and best practices, the team ensures operational excellence and has close ties with product teams at Oracle, IBM, Cloudera, Amazon and Microsoft.

Why we are looking for you:

At Epsilon, we run on our people's ideas. It's how we solve problems and exceed expectations. Our team is now growing, and we are on the lookout for dedicated individuals who always set the standard by constantly challenging themselves and are experts in building customized solutions in the digital marketing space.

So, are you someone who wants to work with innovative technology and enable marketers to create data-driven, omni-channel consumer experiences through data platforms? Then you could be exactly who we are looking for.

Apply today and be part of a creative, innovative and dedicated team that's not afraid to push boundaries or take risks.

What you will enjoy in this role:

Hands-on Learning from Day One

Work on real-time, large-scale data systems and databases from your very first project—no sandbox simulations here.

Impactful Work

You'll manage and optimize data that drives critical decisions across business units—your work matters.

Exposure to Latest Technologies

Get to work with cutting-edge platforms such as Hadoop, Spark, Kafka, AWS/GCP/Azure, PostgreSQL, MySQL, MongoDB, and more.

Problem Solving at Scale

Tackle performance tuning, data migrations, and big data processing challenges—develop strong analytical and debugging skills.

Responsibilities

What you will do

We are looking for Database and Big Data Administrator for On-prem and cloud platforms, where you'll gain hands-on experience managing and optimizing large-scale databases and big data platforms. Collaborate with cross-functional teams to ensure data integrity, performance, and security across our cutting-edge infrastructure. Ideal candidates are detail-oriented, eager to learn, and passionate about emerging data technologies.

Qualifications

- Bachelor's degree in engineering or quantitative discipline
- Strong aptitude in quants and logical reasoning, attention to detail (QA/QC)
- Strong analytic thought process and curious learner
- Highly motivated and collaborative team player with strong interpersonal skills
- Curiosity to learn one or more of data base technologies.

Additional Information

Epsilon is a global data, technology and services company that powers the marketing and advertising ecosystem. For decades, we've provided marketers from the world's leading brands the data, technology and services they need to engage consumers with 1 View, 1 Vision and 1 Voice. 1 View of their universe of potential buyers. 1 Vision for engaging each individual. And 1 Voice to harmonize engagement across paid, owned and earned channels.

Epsilon's comprehensive portfolio of capabilities across our suite of digital media, messaging and loyalty solutions bridge the divide between marketing and advertising technology. We process 400+ billion consumer actions each day using advanced AI and hold many patents of proprietary technology, including real-time modeling languages and consumer privacy advancements. Thanks to the work of every employee, Epsilon has been consistently recognized as industry-leading by Forrester, Adweek and the MRC. Epsilon is a global company with more than 9,000 employees around the world.

Epsilon has a core set of 5 values that define our culture and guide us to create value for our clients, our people and consumers. We are seeking candidates that align with our company values, demonstrate them and make them meaningful in their day-to-day work:

- **Act with integrity.** We are transparent and have the courage to do the right thing.
- **Work together to win together.** We believe collaboration is the catalyst that unlocks our full potential.
- **Innovate with purpose.** We shape the market with big ideas that drive big outcomes.
- **Respect all voices.** We embrace differences and foster a culture of connection and belonging.
- **Empower with accountability.** We trust each other to own and deliver on common goals.

Because You Matter

YOUiverse. A work-world with you at the heart of it!

At Epsilon, we believe people make the place. And everything we do is designed with you in mind. That's why our work-world, aptly named 'YOUiverse' is focused on creating a nurturing environment that elevates your growth, wellbeing and work-life harmony. So, come be part of a people workspace where care for you is at the core of all we do

Take a trip to YOUiverse and explore our unique benefits, [here](#).

Epsilon is an Equal Opportunity Employer

Epsilon is committed to promoting diversity, inclusion, and equal employment opportunities by using reasonable efforts to attract, recruit, engage and retain qualified individuals of all ethnicities and backgrounds, including, but not limited to, women, people of color, LGBTQ individuals, people with disabilities and any other underrepresented groups, traits or characteristics.
