

**Job Title: Associate Software Engineer****Company Description**

Epsilon is a global data, technology and services company that powers the marketing and advertising ecosystem. For decades, we've provided marketers from the world's leading brands the data, technology and services they need to engage consumers with 1 View, 1 Vision and 1 Voice. 1 View of their universe of potential buyers. 1 Vision for engaging each individual. And 1 Voice to harmonize engagement across paid, owned and earned channels. Epsilon specializes in the implementation, management and evolution of Custom and PeopleCloud solutions, offering end-to-end support for clients. By collaborating with client partners and strategy teams, we create impactful campaigns tailored to each client's unique objectives.

Responsibilities:**Job Summary:**

We are looking for Software Engineers with deep technical and problem-solving skills to work on groundbreaking multichannel SaaS Digital Marketing Platform that focuses on uniquely identify the customer's patterns, effectively interact with them across channels and achieve a positive return on marketing investment (ROMI). The platform helps consolidate and integrates the features and functionality typically found in stand-alone services and channel-specific messaging platforms to give marketers a tightly integrated, easily orchestrated, insights-driven, cross-channel marketing capability. The Platform demonstrates an unmatched balance of strong technology with full SaaS Model hosted on cloud, processing billions of customer events.

Qualifications:

- Relational DBMS and SQL knowledge (Oracle, SQL Server, MySQL)
- Language Skills - Data Structures, Java / C++, Python, C#/.NET
- Public Cloud - Amazon Web Services & Azure
- Big Data - Hadoop, Spark, Hive, Stream Processing, Machine learning
- Rest Services Web APIs, JavaScript and Front end Technologies
- Programming skills in SAS, R, Python, SQL
- Good verbal and written communication skills
- Thorough in quality checks
- High aptitude in coding and language skills, quick learner, logical reasoning and problem-solving ability

Additional Information

Epsilon's comprehensive portfolio of capabilities across our suite of digital media, messaging and loyalty solutions bridge the divide between marketing and advertising technology. We process 400+ billion consumer actions each day using advanced AI and hold many patents of proprietary technology, including real-time modelling languages and consumer privacy advancements. Thanks to the work of every employee, Epsilon has been consistently recognized as industry-leading by Forrester, Adweek and the MRC. Epsilon is a global company with more than 9,000 employees around the world. Epsilon has a core set of 5 values that define our culture and guide us to create value for our clients, our people and consumers. We are seeking candidates that align with our company values, demonstrate them and make them meaningful in their day-to-day work:

- Act with integrity. We are transparent and have the courage to do the right thing.
- Work together to win together. We believe collaboration is the catalyst that unlocks our full potential.
- Innovate with purpose. We shape the market with big ideas that drive big outcomes.
- Respect all voices. We embrace differences and foster a culture of connection and belonging.
- Empower with accountability. We trust each other to own and deliver on common goals
