

STEMx Innovation Labs

EMPOWERING SCHOOLS WITH JAPANESE METHODOLOGY OF LEARNING

NURTURE INNOVATORS OF TOMORROW

INDIA | MIDDLEEAST | LONDON(UK) | JAPAN | AFRICA

Over a Decade of Innovation | From Industry 4.0 to Space Tech

500+ Schools

3L+ Students

Our Integrated Programs:

- | Robotics & AI | 3D Printing | Drone Technology
- | AR/VR & Space Tech | Semiconductors & IoT
- | Emerging Technology & Industry 4.0

STEMx International Partnerships

STEMx India has partnered with MiChiTECH an educational brand under the KTC Group from Japan, MiChiTECH is committed in equipping students with 21st-century skills through their exceptional Japanese STEM programs.

Robotics & AI through STEM Curriculum

Junior Robotics & Coding (Grade 1-5)

2

Our 'Introducing Simple & Powered Machines' curriculum pack enables students to work as young scientists, engineers, and designers providing them with settings, tools and activities that promote engineering design, science and mathematics. Using mathematics and computational thinking Constructing explanations (for science) and designing solutions (for engineering),

Our Program is delivered as three levels

1

Early STEM & Play (LKG & UKG)

- Prepare preschool and kindergarten students for school and life by building confidence and social skills while igniting their STEM journey
- STEM Explorer Kit has 120 colourful brick and parts which can be used to build 10+ Science models, 10+ Math Models using the instructions guide
- No Batteries required | 100% Screen-Free | 100% Device-Free

3

Senior Robotics & AI (Grade 6-12)

- From easy-entry lessons to the limitless creative designs, PEECEE AI Kit engages students - regardless of their learning level - in thinking critically, analyzing data, and solving complex problems with real-world relevance.
- Students will apply their engineering design skills for each step of the design process by defining a problem and success criteria, making different prototypes.

Advanced Industrial Education Robots

Children get to work with a range of advanced Industrial Robots

STEM X Series

STEM X2

STEM Y3 Bot
Pepper 5 Feet
Teaching Robot

STEM Z Series

STEM Z1
Dog Robot

STEM Z2
AI Bot

STEM Z3
AI Pro Bot

The STEM Makers & Tinkering Kit by STEMx India is a hands-on innovation toolkits designed to spark creativity and experimentation among students. It empowers learners to **Explore, Build, and Innovate** using cutting-edge technologies such as robotics, IoT, electronics, sensors, and 3D printing. Each kit is thoughtfully curated to align with STEM learning outcomes and encourages students to apply classroom concepts through real-world projects. From assembling circuits to programming robots, the kit transforms abstract ideas into tangible creations, nurturing curiosity, critical thinking, and innovation. With the STEM Makers & Tinkering Kit, students don't just learn science and technology—they experience it, unlocking their potential as the inventors of tomorrow.

STEM Makers & Tinkering Kit

Hands-On Innovation for Grades 1–10

Drone Technology

Learn flight dynamics and control

2D Laser Plotter

Explore laser design

Space Tech

Experience immersive Space Tech learning

AR/VR Technologies

Experience immersive learning

Dome Planetarium

In-house Planetarium experience

3D Printing

Create 3D designs with ease

Clay Plot Wheeler / DIY Hand Kit

Hands-on mechanical creativity

STEMx curriculum

Precisely crafted curriculum from KG - Grade 12

Curriculum Workbooks

BuddyX Coding App

BuddyX LMS

Model 1 Robotics & AI Lab Setup

STEMx India is dedicated to revolutionising STEM education by establishing world-class robotics and AI labs in schools. The program includes comprehensive training for computer-science and science teachers, equipping them to deliver high-quality instruction. A complete curriculum is provided to empower students to excel in cutting-edge STEM fields.

Lab Configurations & Specifications

	BEGINNER (500-800 Sqft)	STANDARD (500-800 Sqft)	ADVANCED (800-1000 Sqft)
Semiconductors & AI Hardware (10 - Set's) (Grade 1–10)	✓	✓	✓
Robotics & AI Engineering (10 - Set's) (Grade 1–10)	✓	✓	✓
Early STEM & Play (10 - Set's) (LKG & UKG)	✓	✓	✓
2 Feet Humanoid Robot (1 - Set) (Grade 3–10)	✓	✓	✓
Drone Technology (2- Set's) (Grade 3–10)	✗	✓	✓
AR / VR (1 - Set) (Grade 1–10)	✗	✓	✓
3D Printing & 3D Doodler (1 - Set) (Grade 1–10)	✗	✓	✓
4.5 Feet Humanoid Teacher (1-Set) (Grade 1–10)	✗	✗	✓
Space Tech Lab (1-Set) (Grade 1–10)	✗	✗	✓
Free Lab Design – Walls	✗	✗	✓

Extended Support Services Provided

The lab setup includes the following comprehensive support services:

- **Lab design** – custom layout and space optimisation.
- **Comprehensive STEM AI & Robotics Curriculum** – full teaching framework.
- **AI & Robotics Software license** – access to required software tools.
- **Books for every student** – tailored learning material.
- **Faculty training** – workshops to equip teachers with skills.
- **Complete maintenance** – ongoing technical support & repairs.
- **Monthly in-person visit** – onsite check-ups and guidance.
- **Weekly delivery plans** – structured implementation schedules.
- **Dedicated Technical Manager** – personalised support & troubleshooting.
- **32 activities per grade** – engaging project-based learning experiences.

Model 2 Robotics & AI Integrated Program

Our comprehensive solution handles end-to-end operations for STEM-based robotics and AI programs, including deploying experienced engineers, providing expert training, guiding students through competitions, and issuing certifications upon completion. This ensures a seamless and effective learning experience for students

	Program 1 Foundation 8 session	Program 2 Explorer 16 session	Program 3 Pioneer 24 session
1 or 2 STEM Engineers	✓	✓	✓
Regular Robotics & AI sessions	✓	✓	✓
Monthly report to School	✓	✓	✓
STEM.org Certification	✓	✓	✓
STEM Marksheet at end of program	✓	✓	✓
Observation & Feedback by Customer Success Manager	✓	✓	✓
PTM & Marketing Support	✓	✓	✓
Train Students for National & International Robotics Competitions	✗	✓	✓
Quarterly Magazine	✗	✓	✓
Student Workbook for Each Child	✗	✗	✓
2 STEM-Based Assessments	✗	✗	✓
1 STEM Fest or Science Fest Support	✗	✗	✓
STEM Integration Activities	✗	✗	✓

Extended Support Services Provided

1. Program Fee (Per Child)
2. Complete Robotics & AI Lab Setup Deployment of Certified STEM Engineers
3. Training for National & International Competitions
4. End-to-End Program Management

Model 3 Individual AI & STEM Kit

Each student receives a standard, grade-wise kit, complete with a manual and all necessary robotics and AI equipment, empowering hands-on learning and innovation.

The Junior Kit Grade 3

The Senior Kit Grade 7

World's Premium AI Lab Setup

India Robotics League (IRL™), pioneered by STEMx India, is a proudly homegrown robotics competition that ignites innovation and creativity among young minds across the nation. Organized in collaboration with the Bharathi STEM Trust, IRL™ is more than just a contest — it's a national movement celebrating STEM education, hands-on learning, and future-ready skills. Each year, students aged 4 to 16 come together to build, code, and innovate using LEGO® kits, sensors, and real-world robotics tools, solving exciting challenges that bring Science, Technology, Engineering, and Math to life. By participating in the India Robotics League, children not only showcase their technical skills but also develop teamwork, problem-solving, and design thinking — preparing them to become the innovators and leaders of tomorrow.

National & International Robotics Competitions

International Alliances

- ◆ **FIRST® LEGO® League (FLL)** A hands-on global robotics challenge introducing children to STEM through LEGO-based missions and real-world problem-solving. Students explore teamwork, innovation, and technical skills.
- ◆ **World Robot Olympiad (WRO)** An international robotics competition that blends education and creativity, where students design and build robots to solve themed challenges and present innovative tech solutions.
- ◆ Both platforms give students international exposure, preparing them for higher global-level competitions.

STEMx Learning Curve

LKG – UKG

- Play-based STEM, logic & patterns
- Screen-Free Sequence Coding
- Maths & EVS
- comes to Real life like counting numbers, shapes, colors, animals etc

Grade 1 – 3

- STEM & robotics basics
- Electronics, mechanics, motion
- Scratch coding, games, AR-VR

Grade 4 – 7

- Robotics, sensors, microcontrollers
- Coding, AI basics, automation
- Drones, 3D printing, real projects

Grade 8 – 10

- Advanced coding (Python, C/C++)
- AI, ML, NLP, ROS systems
- Semiconductors, robotics, drones
